DETAILED ACTION

1. Claims 1-93 are pending in this Office Action.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-57, are drawn to interface for providing transitions, which is classified in class 345, subclass 854.
 - II. Claims 58-73, 90-93 are drawn to provide display transitions, which is classified in class 707, subclass 102.
 - III. Claims 74-89 are drawn to storing navigation states in a data structure, which is classified in class 707, subclass 3.
3. Inventions I, II, III, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, interface for providing transitions in invention I is used in providing path between navigation states. Providing display transitions in invention II is used in to accept a user's selection. Storing navigation in a data structure in invention III is used to searching the data. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2162

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
